Mohit Soni

Software Engineer II (SDE-2) | Backend Engineer | Fintech – Digital Lending

Mumbai, Maharashtra, India | +91-9529824156 | workmohitsoni0@gmail.com | linkedin.com/in/mohitsoni0 | github.com/m0hits0ni | medium.com/@mohitsoni_

PROFESSIONAL SUMMARY

Backend engineer with 6+ years in Python and 4+ years building digital lending platforms in fintech. Tech lead for a team of 6 developers at Kuhoo Finance, owning the credit decision engine (2.75 lakh loans underwritten), the payment service and the loan calculations behind an INR 300 Cr loan book. Builds event-driven, idempotent microservices with Django, PostgreSQL, Redis, RabbitMQ and Celery on AWS and Kubernetes at 99.9% uptime, and ships spec-first with AI coding agents. Leadership: HLD/LLD, architecture governance (ARB), sprint planning, mentoring, technical hiring and stakeholder management.

INR 300 Cr
loan book running on loan calculations I built

2.75 lakh
loans underwritten by the decision engine I own

INR 50 Cr
loan portfolio migration from a partner NBFC, led end to end

77% faster
loan decisions with Green Channel (2.5 hours to 34 minutes)

TECHNICAL SKILLS

Languages and Frameworks: Python, SQL, Django, Django REST Framework (DRF), Celery, Gunicorn, Object-Oriented Programming (OOP)

Backend and Architecture: Microservices, REST APIs, System Design (HLD/LLD), Event-Driven Architecture, Distributed Systems, Asynchronous Processing, Idempotency, High Availability, Fault Tolerance, Scalability, Load Testing

Databases and Messaging: PostgreSQL, Database Design, Query Optimization, Indexing, Django Migrations, Redis, Caching, RabbitMQ

Cloud and DevOps: AWS (EC2, S3, RDS/Aurora, ElastiCache, EKS), Docker, Kubernetes, Git, GitLab CI/CD, Zero-Downtime Deployment, Kibana, Sentry, Root Cause Analysis (RCA)

AI-Assisted Development: Claude Code, Claude, Cursor, Spec-Driven Development, Agentic Coding, Prompt Engineering, Cursor Rules, pytest (AI-generated tests)

Security and Compliance: Data Protection (DPDP Act), Data Governance, Audit Logging, IDOR Prevention, Role-Based Field-Level Security, JWT, OAuth2, Two-Factor Authentication (2FA)

Fintech Domain: Digital Lending, Loan Origination System (LOS), Loan Management System (LMS), Credit Decision Engine, Underwriting, Loan Calculations (EMI, Part Payment, Foreclosure), Payments, Portfolio Migration, Multi-Lender Loan Aggregation, KYC, Video KYC (V-KYC), CKYC, e-Aadhaar (DigiLocker), PAN Verification, Partner Onboarding, Loan Disbursement, Tranche Processing, E-Signature, Document Verification, OCR

Integrations: Signzy, HyperVerge, Digio, Cashfree, DigiLocker, OneFin LMS

PROFESSIONAL EXPERIENCE

Kuhoo Finance Private Limited — *Mumbai, Maharashtra, India*

Software Engineer II (SDE-2) — February 2025 – Present

Software Engineer (SDE-1) — September 2022 – February 2025

LEADERSHIP AND OWNERSHIP

- Lead a team of **6 developers** building Kuhoo's Loan Origination System (LOS) and Loan Management System (LMS); drive requirement elicitation, HLD/LLD, database design, API specifications and sprint planning for the LMS team. Core **Architecture Review Board (ARB)** member; promoted from SDE-1 to SDE-2 in February 2025.
- Own the **Decision Engine**, which has enabled credit underwriting of **2.75 lakh loans**, and the **Payment Service** that processes every payment at Kuhoo.
- Led the **INR 50 Cr portfolio migration** from a partner NBFC to Kuhoo Finance Pvt. Ltd.
- Mentored interns and onboarded them as backend developers; created Kuhoo's onboarding process for backend developers.

LENDING PLATFORM

- Individual contributor for **all loan calculations** behind the **INR 300 Cr loan book**: designed (LLD) and built the EMI calculator, and delivered part payment and foreclosure end to end.

- Architected the LOS, LMS and a **multi-lender loan aggregator for 4–5 NBFCs**, with KYC, Video KYC, CKYC and tranche-disbursement flows; designed (LLD) and integrated the OneFin Loan Management System.
- Designed the **Green Channel** fast-track flow with data-driven eligibility checks, cutting turnaround time **77%** (2.5 hours to 34 minutes) and lifting disbursement conversion **8%**.
- Automated loan sanction and disbursement for **500+ applications a day**, integrating 8+ third-party services and cutting manual document work by **70%**.
- Built **50+ REST APIs** and features across microservices including LOS, Verification, User Management, MDM and Document services, and the backend of the Partner Onboarding System.

KYC, DOCUMENTS AND AUTOMATION

- Re-architected the **Verification microservice** to integrate HyperVerge, Digio and Signzy for KYC, implementing e-Aadhaar via DigiLocker, PAN, Aadhaar and video verification.
- Engineered OCR extraction for PAN, Aadhaar, salary slips and mark sheets, letting **72%** of documents skip manual review; integrated a third-party **AI voice bot** and OCR handling **80K+ monthly events**, cutting manual calling effort by **60%**.

SECURITY, PERFORMANCE AND RELIABILITY

- Owned **DPDP Act** data protection and governance: an audit log of the entire loan history, **IDOR protection** with object-level authorization on customer and loan APIs, and **role-based field-level security** across all backend APIs.
- Optimized PostgreSQL and Redis, improving API response time up to **60%** and database retrieval **45%**; moved PII-vault lookups to a hash index; modeled and indexed lending schemas with **1M+ records**.
- Defined the approach for Gunicorn worker and thread configuration and load-tested microservices to measure RPS and throughput; set the team's approach to Django database migrations and migration-file management.
- Diagnosed and fixed a production **Redis connection leak on AWS ElastiCache** caused by gevent context switching in Celery workers, leading the root-cause analysis; debugged and stabilized core lending services, contributing to 99.5%+ uptime.
- Ship features spec-first with **Claude Code** and **Cursor**, using AI agents to implement each spec and write **pytest** tests for test-gated CI/CD.

TMedia Business Solution Private Limited *Ahmedabad, Gujarat, India*

Software Development Engineer February 2022 – August 2022

- Developed Python/Django microservices with KYC and OCR integrations; automated GitLab CI/CD on AWS (**80% fewer deployment errors**) and raised test coverage to **85%**.

Zucol Services Private Limited *Jaipur, Rajasthan, India*

Software Development Engineer April 2020 – January 2022

- Delivered a DRF-based task-management platform for **100+ employees** with PyOTP-based 2FA and audit logging.
- Improved PostgreSQL data-retrieval performance by **30%** through database design and query optimization; shipped production APIs used by frontend teams.

EDUCATION

Bachelor of Technology (B.Tech), Electronics and Communications Engineering 2020

Rajasthan Technical University, Kota, Rajasthan, India

WRITING

Technical articles on Medium (medium.com/@mohitsoni_) on PostgreSQL internals and scaling, RabbitMQ, data structures in real-world backend systems, and production RAG pipelines with PostgreSQL 18 and pgvector.
