MOHIT SONI

Software Engineer II (SDE-2) | Backend Engineer | Fintech - Digital Lending
Mumbai, Maharashtra, India
+91-9529824156 | workmohitsoni0@gmail.com | linkedin.com/in/mohitsoni0 | github.com/m0hits0ni

PROFESSIONAL SUMMARY

Software engineer with 6+ years in Python backend development, including 4+ years building education-loan platforms in fintech. Owns the Decision Engine, Payment Service and loan calculations behind Kuhoo's INR 300 Cr loan book. Builds event-driven, idempotent microservices with Django, PostgreSQL, Redis, RabbitMQ and Celery on AWS and Kubernetes at 99.9% uptime, using AI coding agents daily. Leadership: mentoring, design and code reviews, architecture governance, technical hiring and stakeholder management.

TECHNICAL SKILLS

Languages and Frameworks: Python, SQL, Django, Django REST Framework (DRF), Celery, Gunicorn, Object-Oriented Programming (OOP)

Backend and Architecture: Microservices, REST APIs, System Design (HLD/LLD), Event-Driven Architecture, Distributed Systems, Asynchronous Processing, Idempotency, High Availability, Fault Tolerance, Scalability, Load Testing

Databases and Messaging: PostgreSQL, Database Design, Query Optimization, Indexing, Database Migrations, Redis, Caching, RabbitMQ

Cloud and DevOps: AWS (EC2, S3, RDS/Aurora, ElastiCache, EKS), Docker, Kubernetes, Git, GitLab CI/CD, Zero-Downtime Deployment, Kibana, Sentry, Root Cause Analysis (RCA)

AI-Assisted Development: Claude Code, Claude, Cursor, Spec-Driven Development, Agentic Coding, Prompt Engineering, Cursor Rules, pytest (AI-generated tests)

Security and Compliance: Data Protection (DPDP Act), Data Governance, Audit Logging, IDOR Prevention, Role-Based Access Control (RBAC), Field-Level Security, JWT, OAuth2, Two-Factor Authentication (2FA)

Fintech Domain: Digital Lending, Loan Origination System (LOS), Loan Management System (LMS), Multi-Lender Loan Aggregation, Credit Underwriting, Decision Engine, KYC, Video KYC (V-KYC), CKYC, Partner Onboarding, Loan Disbursement, Tranche Processing, Payments,
Loan Calculations (EMI, Part-Payment, Foreclosure), E-Signature, Document Verification, OCR

Integrations: Signzy, HyperVerge, Digio, Cashfree, DigiLocker, OneFin

PROFESSIONAL EXPERIENCE

Kuhoo Finance Private Limited *Mumbai, Maharashtra, India*
Software Engineer II (SDE-2) February 2025 - Present

- Tech lead for a team of **8 developers** building the LOS and LMS; led requirement elicitation, HLD/LLD, database design, API specifications and sprint planning for the LMS team.
- Architected the LOS, LMS and a **multi-lender loan aggregator** for **4-5 NBFCs**, with KYC, Video KYC, CKYC and tranche-disbursement flows; designed and built the **OneFin LMS** integration.
- Individual contributor responsible for **all loan calculations** behind the **INR 300 Cr** loan book, including the EMI calculator (LLD and build) and end-to-end **part-payment and foreclosure**.
- Owned the **Decision Engine** behind credit underwriting of **275K loans**, and the **Payment Service** that handles every payment at Kuhoo.
- Led the **INR 50 Cr portfolio migration** from a partner NBFC to Kuhoo Finance.
- Designed the **Green Channel** fast-track flow with data-driven eligibility checks, cutting turnaround time **77%** (2.5 hours to 34 minutes) and lifting disbursement conversion **8%**.
- Owned **DPDP Act data protection and governance**; architected and implemented an **audit log** of the entire loan history, eliminating manual tracing.
- Implemented **IDOR protection** with object-level authorization on customer and loan APIs, blocking any cross-customer or cross-loan data access.

- Integrated a third-party **AI voice bot** and OCR handling **80K+** monthly events, cutting manual calling effort by **60%**.
- Engineered OCR extraction for PAN, Aadhaar, salary slips and mark sheets, letting **72%** of documents skip manual review.
- Optimized PostgreSQL and Redis, improving API response time up to **60%** and database retrieval **45%**; moved PII-vault lookups to a hash index.
- Shipped features spec-first with **Claude Code** and **Cursor**, using AI agents to implement each spec and write **pytest** tests for test-gated CI/CD.
- Diagnosed and fixed a production **Redis connection leak on AWS ElastiCache** caused by gevent context switching in Celery workers, leading the root-cause analysis.
- Promoted from SDE-1 to SDE-2 in February 2025; core Architecture Review Board (ARB) member; created the backend-developer onboarding process and mentored interns through it.

Software Engineer (SDE-1) September 2022 - February 2025

- Built **50+ REST APIs** with Django REST Framework across loan application, processing, document verification and disbursement journeys.
- Automated loan sanction and disbursement for **500+ applications a day**, integrating **8+** third-party services and cutting manual document work by **70%**.
- Re-architected the **Verification microservice** to integrate HyperVerge and Digio for KYC; implemented e-Aadhaar (DigiLocker), Aadhaar, PAN and video verification and integrated Signzy.
- Built the backend of the **Partner Onboarding System** and shipped features across the LOS, Verification, User Management, MDM and Document microservices.
- Implemented **role-based field-level security** across all backend APIs, controlling access to individual parameters stored in the database.
- Modeled PostgreSQL schemas for lending workflows and indexed tables with **1M+ records** for high-volume transactional workloads.
- Demonstrated the approach for **Gunicorn** worker/thread configuration and Django migration management; **load-tested** a microservice to measure its RPS and throughput.
- Debugged and stabilized core lending services in production, contributing to **99.5%+** uptime.

TMedia Business Solution Private Limited *Ahmedabad, Gujarat, India*

Software Development Engineer February 2022 - August 2022

- Developed Python/Django microservices with KYC and OCR integrations; automated GitLab CI/CD on AWS (**80%** fewer deployment errors) and raised test coverage to **85%**.

Zucol Services Private Limited *Jaipur, Rajasthan, India*

Software Development Engineer April 2020 - January 2022

- Delivered a DRF-based task-management platform for **100+ employees** with PyOTP-based 2FA and audit logging.
- Improved PostgreSQL data-retrieval performance by **30%** through database design and query optimization; shipped production APIs used by frontend teams.

EDUCATION

Bachelor of Technology (B.Tech), Electronics and Communications Engineering 2020
Rajasthan Technical University, Kota, Rajasthan, India
